www.bespokemetaldesigns.com

MM Soul (UK) Ltd has a collection of trading names with a proven track record of more than 50 years in the design and manufacture of metal products. Our manufacturing experience supported by our extensive design and engineering expertise has allowed us to develop our own products using a combination of traditional and modern manufacturing facilities.

However, in addition to our specialised product range, we are also able to offer a bespoke service to meet customer's specific requirements. Quality is controlled through our range of processes and skills. We are able to offer small or large batches, using the best methods to provide the most economical solution, while maintaining a high quality creation, with a focus on flexible lead times.
